Dear Members of the Selectboard

We are residents and abutters of upper Willey Hill Road in Norwich. We have become increasingly concerned by the deterioration in the conditions of the road and its impact on our safety and quality of living.

Despite the heroic efforts of Andy and his road crew, the unpaved portion of Willey Hill has reverted to deep ruts shortly after being regraded time and again. This spring has reached a new level of problem ruts. Cars have gone off the road and often scrape bottom. It is unsafe. We strongly recommend that consideration be given to paving the upper stretch at least to Hawk Pine which is the cause of much of the traffic, at least several hundreds of cars and trucks on a daily basis.

The elimination of the cost of frequent regrading surely will cover much of the paving costs. In addition, it will be more environmentally friendly to eliminate the frequent applications of salted sand that is being washed down the hill into our streams and land.

Sincerely,
